The iPad Mini Universal Kneeboard Folio™ C (including clipboard) is the perfect high quality leather, rotating aviation kneeboard, lapboard and everyday case for your iPad Mini 1/2/3/4/5, and all other 7-8" tablets. The iPad/Tablet is held by four adjustable clips that are attached to a rotating cradle. All of the ports and controls remain accessible so the iPad/Tablet can be charged, synced and controlled in the folio.

The iPad Kneeboard Sport Case made of black, smooth polycarbonate adds protection and a great feel to the iPad 11 1st-Generation. It is designed to work in aircraft where space is tight or where there is a cyclic, or control stick being used between the legs. It is perfect for pilots of helicopters, sport aircraft, and when there is tight yoke clearance or when mounting is desired. It comes with a Velcro strap.

The iPad Sport Cool Case is the first iPad case to add high-end gaming laptop cooling technology engineered to provide maximum airflow with minimum noise. Powered directly from the iPad or with the supplied USB-C cable. The cooling case can be used either as a mountable case or kneeboard and can be used in direct sun.
